

Khansaheb Sykes LLC

Pump Workshop/Operations Supervisor - Location: UAE

About the Company:

With over 30 years' experience in the UAE, Khansaheb Sykes is the number one specialist for Dewatering and the hire and sale of Pumping Solutions. With massive experience of groundwater control, as well as general pumping, our specialist knowledge sets us apart from the competition, and has led to our involvement in major infrastructure projects, such as the Shindegah Tunnel Crossing, Jebel Ali Port and Dubai Dry Docks.

A subsidiary of Andrews Sykes Group, the UK's largest specialist hire company, our business is founded on the expertise and know-how of Sykes Pumps, which celebrated its 150th anniversary in 2007.

With operational bases in Abu Dhabi, Dubai and Sharjah, we have plans for further growth across the Middle East, and invite application from a suitably qualified and experienced person to supervise our Pump workshop and operations and contribute to the continuing success of a progressive and professional operation.

Job Description:

Responsible for:

- Efficient utilisation of workshop plant and technical staff
- Effective control of service arrangements
- Quality Control of receipt inspection, assembly and testing of services plant.
- Improving maintenance and reducing breakdowns through analysis of site and service reports.
- Training of site and service staff and engine mechanics
- Vendor development
- Troubleshooting
- Maintaining Plant Utilisation reports

Requirements:

- Strong technical knowledge of pumps, diesel engines and pump applications
- Minimum of 2 years' resident experience in the Middle East
- Must be fluent in both written and spoken English; some knowledge of Arabic would be an advantage but is not essential.
- Excellent skills supervising a culturally diverse workforce
- Computer literacy and administration skills
- Driving Licence essential

To apply: Please send your CV/resume and a covering letter to ksykes@khansahebsykes.com
